

Direct Aid Society Report

During the Corona crisis

Direct Aid Society plays an active role in supporting official and civil efforts to combat the Corona epidemic in all 31 countries in which it operates; this role comes in line with the commendable efforts of Kuwaiti charities in various fields, starting from the recommendations of His Highness the Amir of the country, in which he urged Kuwaiti associations and citizens to join hands, cooperate and redouble efforts to provide relief to those affected by the pandemic, In support of the humanitarian reputation of the State of Kuwait and its generous role, for which Kuwait has earned the title of Country of Humanity

1

Supporting governments efforts to prevent the virus spreading through the purchase of urgent medical materials and sterilisation tools, as well as providing logistical support to health centres. In addition, the organisation will provide capacity support to countries and areas affected by coinciding crises such as natural disasters.

2

Direct Aid's urgent relief programme aims to provide emergency humanitarian and relief assistance to tackle the threat of the COVID-19 epidemic. Our teams started to help disadvantaged families in the most vulnerable countries on the continent, including Tunisia, Zimbabwe, Senegal, Rwanda, Senegal and Benin, by distributing basic food provisions.

3

During the months of March and April, medical awareness campaigns continue through the air of Direct Aid broadcasts providing health advice and awareness-raising to prevent infection.

4

From all health centers established and managed by Direct Did, mobile medical convoys were sent to visit villages to raise awareness about the Covid 19 virus, and to provide instructions and distribute posters + hand sanitizer + liquid soap, The homes of orphans sponsored by the association have also been targeted with visits and their neighbors confirm the safety of orphans during their vacation.

5

Carrying out general sterilization for all centers and offices facilities continuously according to the recommendations of the Ministry of Health for each country and in cooperation with the civil defense the moon on the health and safety of workers and all children.

6

Closing schools and universities as a precautionary measure against the Corona virus until further notice, and to deliver our orphan children to their families in some countries to protect them from the chance of infection while continuing to follow up and communicate to meet the needs of the orphan and his family

7

Purchase the necessary supplies for all the association's centers that house orphans and workers in order to avoid frequent departures and increase the chance of infection.

Efforts are continuing to mitigate the effects of the epidemic and bring safety to the largest possible number of the poor African population
